

We want to make sure you know the basics about living with diabetes before you leave the hospital. To help with that, we have created a booklet [*show booklet*] and some videos about your diabetes for you to watch on this iPad.

Are you feeling up to watching a few videos right now?

[If no] Okay, that's fine. I will come back when you are feeling better. We can try again [*this afternoon or tomorrow*]. I am going to leave you with this booklet, which is yours to keep. It has a lot of information that should help you with understanding your diabetes, and it has login information for your account for the videos.

[If yes] Great! I'm going to help you log into the system, and then you will be asked a few questions to see what you already know about diabetes. After that, you will be able to watch some short videos. Most of the videos are less than 2 minutes long. When you're done with the videos, you'll be asked a few more questions.

I'm going to leave the iPad here with you, so you don't have to do it all at once, but you can if you want to. Your family and friends can also watch the videos if you give them your login information. If you have any problems with the iPad, ask your tech to let me know and I'll see if I can help. If you have questions about the videos or your diabetes, make sure you ask your nurse.
