## **MAKING HEALTH:**

*An Interactive Celebration of How Tinkering, Technology and Design Tools are Transforming Healthcare*

**THURSDAY, JUNE 23, 2016**

Interactive Demonstrations: 2:00–5:30 pm

Reception: 5:30–7:00 pm

**GEORGETOWN UNIVERSITY LEAVEY CENTER**

Join us for this exciting, interactive event showcasing how healthcare practitioners, patients, designers, engineers, entrepreneurs, and other tinkerers are creating healthcare solutions by transforming an idea from a quick sketch on the back of a napkin to a working prototype.

This event – part of the White House National Week of Making – is open to anyone interested in:

- Learning how the democratization of technology and design tools has led to the maker movement in health care – creating physical objects to help people live more independently, in better health, and with greater dignity.
- Sharing creative ideas with key healthcare leaders from both inside and outside government including the:
  - National Institutes of Health
  - U.S. Food and Drug Administration
  - U.S. Department of Veteran Affairs
  - MedStar Health's National Center for Human Factors in Healthcare, the Medstar Simulation Training and Education Lab (SiTEL)
  - 1776
  - Smithsonian and many more.

To attend, please RSVP to the MedStar Institute for Innovation at: [maker.medstarhealth.org](http://maker.medstarhealth.org)
