The Birth Experience

The birth of a baby is one of the most memorable experiences of a lifetime. At MedStar St. Mary’s Hospital, we want that experience to be one you will treasure always. Our beautifully appointed Family Birthing Center features five comfortable birthing rooms furnished with the ambience of home. A Jacuzzi room provides a relaxing setting with the holistic benefits of aquatic therapy. Twelve postpartum rooms are designed especially to accommodate families sharing this once-in-a-lifetime experience. We provide a Mother-Baby model of care so during each shift you and your baby will have the same nurse. Each patient room is private and there are friendly waiting areas for extended families. Our compassionate, experienced associates and expert OB/GYNs and midwives are dedicated to this cherished event.

MedStar St. Mary’s has a telemedicine link with Children’s National Medical Center. If your baby requires consultation with a specialist from Children’s, a consult may be conducted in real time through the telemedicine link. By working together with other cancer research facilities, the team is able to make national clinical trials available to local residents without requiring them to travel long distances. Under the auspices of the MedStar Washington Hospital Center Investigational Review Board, MedStar St. Mary’s Hospital offers the National Surgical Adjuvant Breast and Bowel Project (NSABP), pharmaceutical studies and MedStar Washington Hospital Center clinical trials for all eligible and consenting participants. We also offer clinical trials through MedStar Franklin Square Hospital, with approval from the Investigative Review Board of MedStar Georgetown University Hospital.

Cancer Care and Infusion Services

Cancer Care and Infusion Services (CCIS) offers both inpatient and outpatient oncology services. These include chemotherapy/biotherapy administration, bone marrow aspirations, biopsies, thoracentesis, blood/blood product transfusion, venous access device management, intravenous hydration, and antibiotics. MedStar St. Mary’s Hospital also provides medical oncology/hematology evaluations and consultations; patient education and counseling; cancer surgery; and diagnostic testing.

All cancer services are coordinated by Cancer Care and Infusion Services, which is located on the first floor of the hospital’s Outpatient Pavilion. Patient parking is available adjacent to the Pavilion; this area is wheelchair accessible. CCIS is open Monday through Friday from 7 a.m. to 5:30 p.m. A physician is available on site Monday through Friday.

By working together with other cancer research facilities, the team is able to make national clinical trials available to local residents without requiring them to travel long distances. Under the auspices of the MedStar Washington Hospital Center Investigational Review Board, MedStar St. Mary’s Hospital offers the National Surgical Adjuvant Breast and Bowel Project (NSABP), pharmaceutical studies and MedStar Washington Hospital Center clinical trials for all eligible and consenting participants. We also offer clinical trials through MedStar Franklin Square Hospital, with approval from the Investigative Review Board of MedStar Georgetown University Hospital.

Our cancer program and tumor registry are fully accredited by the American College of Surgeons Commission on Cancer. Our program is also accredited by The Joint Commission. Supportive care and treatments are offered to some pediatric patients in conjunction with Children’s National Medical Center, The Johns Hopkins Hospital and MedStar Georgetown University Hospital.

CCIS assists in referrals for thoracic surgery, bone marrow transplants, stem cell transplants, cryotherapy for liver metastasis and other treatments as needed. We can also refer individuals for clinical trials that are open elsewhere in the country, if not offered in the Baltimore/Washington area.

Guide to Medical Services
We’re on your side, helping you fight cancer with everything we’ve got!

Cancer Care & Infusion Services at MedStar St. Mary’s Hospital offers you the most advanced technology to prevent, detect and treat cancer so yours can be a success story. Our team of board certified oncologists and certified oncology nurses believe that personalized treatment is a key part of the healing process.

We deliver the highest quality of care with compassion in a supportive, welcoming environment. We endeavor to provide you with care as excellent or better than in any other major hospital, but in the comfort of your home community. We work closely with medical oncologists and surgeons in all of the Washington and Baltimore area hospitals and cancer centers, including MedStar Georgetown University Hospital’s Lombardi Comprehensive Cancer Center. Most of your chemotherapy needs can be met at MedStar St. Mary’s.

- **Comprehensive breast care** is available, including breast imaging, biopsies, surgical care, chemotherapy, and genetic counseling onsite. We also partner with Chesapeake Potomac Regional Cancer Center for radiation therapy.
- Skilled, well-trained pathologists are on site. Correct pathological diagnosis is essential for the management of every case.
- All types of imaging studies at MedStar St. Mary’s Hospital are provided, including PET/CT scans, which play a vital role in the management of every cancer patient.
- MedStar St. Mary’s has an effective blood bank with dedicated staff that are well trained in the field. Patients can receive various blood products, including red cells and platelets.
- Our Cancer Care & Infusion nurses provide exceptional care and are nationally recognized oncology certified professionals.
- A navigator assists patients in finding appropriate care, even if it is needed at a tertiary facility, and helps to educate patients, and coordinate their care.
- Our electronic medical records are easy to share with other treating physicians, both in town or at other medical facilities, saving you time.
- Our program is fully accredited with five commendations by the American College of Surgeons Commission on Cancer.
- We provide complete support services, diagnostic services and access to clinical trials anywhere in the country.

301-475-6070 PHONE
Cardiology
MedStar St. Mary's Hospital offers a full range of cardiology services on an inpatient and outpatient basis. The department specializes in the assessment and diagnosis of heart disorders using the latest technology equipment and procedures. Services include EKGs, stress tests and echocardiograms. In addition, MedStar St. Mary's Hospital partners with Children's National Medical Center to offer a pediatric cardiology clinic and services in our Outpatient Pavilion.

Adult Services: 301-475-6399
Pediatric Services: 301-475-6019

Case Management
Care coordination is an important part of every patient's hospitalization. Case Management is the process in which skilled registered nurses, known as case managers, work with social workers and utilization nurses to assist patients and caregivers through the healing process to discharge. Case managers make sure that tests, procedures and activities deemed critical to patients are performed as efficiently as possible. Case managers also help patients and families set up effective discharge plans. Utilization review nurses keep in touch with insurance companies to maximize insurance benefits for patients. Social workers help with complicated social or discharge patient needs. They help make the transition to leave the hospital a smooth process. Case Management emphasizes a team approach to quality patient care. Your doctor coordinates your care along with your case manager, your utilization review specialist, social worker and other members of our professional healthcare team, such as your unit nurse, therapists, dietitians and technicians.

Emergency Department
Patients needing emergency medical treatment will be cared for in the hospital's Emergency Department, open 24 hours a day. This unit features 30 private treatment rooms and an expanded triage area. The unit is equipped with a large trauma room, a decontamination center and a seven-room Fast Track for minor injuries and illnesses.

301-475-6110

The Grace Anne Dorney Pulmonary & Cardiac Rehabilitation Center
Our pulmonary and cardiac rehabilitation is a state-of-the-art program featuring comprehensive services that provide progressive, medically supervised exercise and education to improve the lives of individuals with pulmonary or cardiac disease. The center is conveniently located just inside the front entrance of MedStar St. Mary's Hospital adjacent to the main lobby.

In addition to our pulmonary and cardiac rehabilitation program, the center offers supervised exercise programs with physician approval. The MedFit and Teenfit programs are individually designed to fit a participant's needs and any medical concerns.

240-434-7143

Drug Information
The MedStar St. Mary's Hospital Pharmacy maintains an up-to-date pharmaceutical reference library and an electronic drug information center that can provide accurate information on any medication. Our Pharmacy is open 24 hours a day. For medication information, visit MedStarStMarys.org or call the number listed below.

301-475-6072

Guide to Medical Services

Find out how our dedicated staff can help you with pulmonary and cardiac rehabilitation needs. Our progressive program is designed to help individuals rebuild their strength and endurance to safely resume life's demands, whether to going to work or pursuing a favorite hobby.
**Health Connections**

Health Connections is the community health and education department of MedStar St. Mary's Hospital. Free and low cost programs are offered in the MedStar St. Mary's Hospital Outpatient Pavilion and in the community. Health Connections offers workplace wellness programming and community leadership in health focused coalitions aimed at improving the overall health of the communities we serve. Health Connections is also home to an American Diabetes Association recognized Diabetes-Self Management Education program, where educators provide diabetes education and guidance by one-on-one counseling sessions or in group settings. Individual medical nutrition counseling is also available. Health Connections is also home to the Breast-feeding Resource Center, Parents-to-Be classes and support groups. Health Link is a series of programs designed to help individuals manage chronic health conditions. Health Link focuses on several programs, including Living Well with Chronic Conditions; Stroke Survivors; Seven Healthy Habits of People Living with Diabetes; Living Well with Cardiovascular Disease; and many other support groups and informational sessions. Classes are listed on the hospital’s website at MedStarStMarys.org and in the hospital’s quarterly Healthy Living magazine. Call 301-475-6019 to register for any Health Connections offering.

**Get Connected to Health Primary Care Service**

Healthcare providers are available on the Get Connected to Health mobile medical van five days a week to address the primary care needs of the uninsured and underinsured residents of St. Mary’s County. The charge for each patient visit is $15 and some Medicaid insurances are accepted. Get Connected to Health offers basic primary care services such as health checkups, physicals, limited laboratory testing, and medication management. To schedule an appointment, call 301-475-6019.

**Home Care**

Chesapeake-Potomac Home Health Agency (CPHHA), the largest homecare agency in Southern Maryland, has been providing exceptional homecare services to residents of Calvert, Charles and St. Mary’s counties since 1995. CPHHA is a full-service agency offering skilled nursing, physical therapy, occupational therapy, speech language pathology, social work, and homecare aide to homebound patients. Over the last few years, CPHHA expanded its homecare services to include medication management, phlebotomy and private duty aide services. The agency is owned and operated by Calvert Memorial Hospital, Civista Medical Center, MedStar St. Mary’s Hospital, and the St. Mary’s County Health Department. 800-656-4343

**MedStar St. Mary’s Hospital**

**Hospice**

Hospice is a philosophy of caring for those facing a life-threatening illness. The hospice philosophy is that the patient’s and family’s goals for care and comfort are paramount. The object is to treat the whole person and not just the disease. Hospice is an active treatment option that focuses on holistic patient/family-centered care that addresses the physical, emotional, spiritual and practical needs of the patient. The interdisciplinary team of healthcare professionals works with the patient and family to design and implement a plan of care that is unique to the patient’s needs. Depending on the patient/family goals, many treatment modalities can be initiated, such as physical or occupational therapy; dietary counseling; oxygen; medications; Reiki; massage; music and pet therapy; and durable medical equipment. The Hospice bereavement team continues to care for families for 13 months following the death of their loved one. Bereavement care focuses on helping family members understand and move forward in the grief process through groups, classes, counseling, personal contact and special events such as the Memorial Service and Camp Sunrise for children. Bereavement services are offered to anyone in our community who has suffered a loss.

**Hospice House of St. Mary’s**

At times, individuals with terminal illnesses need care that cannot be provided in their own homes. The Hospice House often cares for patients who live alone, patients who have a caregiver unable to continue to care for them, or if there is intense pain or symptom management needs. For these individuals, Hospice House offers care and a place to call home.

301-994-3023

**Guide to Medical Services**
Hospitalists
A Hospitalist is a physician who manages and coordinates your inpatient care from admission to discharge. This individual will be in frequent contact with your primary care doctor on every aspect of your medical care – whether your admission was planned or the result of an emergency.

Our Hospitalists are available to visit with you 24 hours a day, seven days a week. They do not have individual practices outside of our hospital and are dedicated to treating and caring for patients admitted to our facility. We also retain Hospitalists on staff who are specially trained in pediatric care and who are dedicated to our younger patients.

Should you require medical attention when your primary care physician is unavailable, one of our skilled hospitalists will provide you with the same level of exceptional care you’ve come to expect from MedStar St. Mary’s Hospital.

Imaging
The Imaging Department offers a full complement of procedures, including radiology (X-ray), fluoroscopy, digital mammography, angiography, bone densitometry, interventional radiology, ultrasonography, multi-slice Computerized Tomography (CT), Magnetic Resonance Imaging (MRI) and nuclear medicine scans. PET/CT is offered two days a week and stereotactic breast biopsies are performed twice a month. PICC insertions and removals are also available Monday through Friday from 8 a.m. to 4 p.m. The Radiologists on staff and who are interpreting exams are sub-specialists affiliated with Center Radiology, P. C. at MedStar Washington Hospital Center.

Outpatient Imaging is located in the Outpatient Pavilion at MedStar St. Mary’s, on the campus grounds next to the main hospital. The Imaging Suite is designed for patient comfort and offers a separate suite for Women’s Health Services, including a separate changing and waiting area for patient privacy and comfort. The Women’s Imaging Center offers all of the services of a comprehensive breast cancer center, including Stereotactic, Ultrasound and MRI guided biopsies. In addition, a nurse patient navigator dedicated to providing the individualized care and assistance each patient deserves is on staff.

Intensive Care Center
MedStar St. Mary’s Hospital’s Intensive Care Center (ICC) provides ongoing intensive medical attention for those who are seriously ill. Our state-of-the-art center is located on the third floor, featuring 12 large intensive care rooms, along with a cutting-edge monitoring system, and a unique design to bring our patients and their caregivers closer while affording maximum privacy and comfort. While in the Intensive Care Center, patients will receive special care as prescribed by their physicians. Our on-site ICC care is supported by our tele-ICU and critical care physicians care for our highest acuity cases. In addition, our healthcare professionals will closely manage patient needs, including nutrition, activity, rest, education, and psychological support.

Laboratory Services
Our Laboratory performs diagnostic testing using state of the art technology for general, acute and intensive care inpatients and outpatients of all ages, as ordered by physicians. The department also provides consultation services to physicians in the areas of medical care related to diagnosis and evaluation of therapy as it concerns anatomic and clinical pathology. Testing is performed based on current national standards and methodology in a timely manner for completion of results to optimize patient care.

The main hospital campus laboratory and laboratory
Midwifery
A midwife focuses on the natural processes of pregnancy, labor and birth while combining traditional skills and modern medical techniques to safeguard normal childbirth. In addition to caring for laboring women, midwives often play the role of educator, guiding those who wish to learn more about issues, such as postpartum depression and breastfeeding, and offering in-service seminars for nurses. Our labor and delivery area is staffed with a midwife Monday - Friday to assist as needed.

Pain Management
Pain is the discomfort that alerts you to the fact that something is wrong with your body. It can result from any condition that stimulates special pain sensors and it may help protect the body from further damage. Once the source of pain is pinpointed, the reduction of suffering becomes an important goal in patient care.

The Pain Management program at MedStar St. Mary's Hospital is designed to reduce pain and suffering in a variety of patient care settings. The Department of Anesthesiology provides an array of inpatient and outpatient pain management options and services. These include diagnostic and therapeutic procedures for patients with a variety of pain syndromes, as well as postoperative pain management using several state-of-the-art techniques.

Patient Advocacy
When patients come to MedStar St. Mary's Hospital for health care, all their energy is focused on getting better. But sometimes patients need someone to talk to – someone who can create a bridge between the patient and the staff caring for him or her. At MedStar St. Mary's, our patient advocates fill that role. If you have a concern, or feel a patient advocate could offer you assistance, call 240-434-7022 and the patient advocate will assist you. You may also call the main number at 301-475-8981 and the operator will page the patient advocate for you.

Neurology/Sleep Center
The hospital offers a complete range of neurology services, including the electroencephalogram (EEG) and a fully equipped sleep lab.

The Sleep Disorders Center at MedStar St. Mary’s Hospital offers advanced technology for the diagnosis of sleep problems. The center contains sophisticated monitoring equipment and comfortable, private sleep-study rooms conducive to testing. We have also added home sleep studies to our range of services. Patients can be diagnostically tested for a variety of disorders that interrupt sleep, including insomnia, sleep apnea, narcolepsy and restless leg syndrome. We also offer pediatric EEGs for children ages 2 to 17 years old.

Pulmonary Medicine
Our respiratory therapists are healthcare professionals licensed by the State of Maryland. We provide care to all patients with chronic (long-term) and acute illnesses involving the lungs. Our services include diagnostic testing, ventilator management, breathing treatments, preventive care, and education. This quality care is provided for inpatients as well as outpatients. Our expertise is important to the team approach to patient care throughout the hospital. We also offer pulmonary rehabilitation through The Grace Anne Dorney Pulmonary & Cardiac Rehabilitation Center. We offer adult pulmonary function tests and pediatric pulmonary function tests for ages 6 to 17 years old.

Guidance to Medical Services

Maryland eCare
MedStar St. Mary’s went live in March 2010 with the new eCare system, which is an electronic monitoring technology in the hospital’s ICC. The program complements local care utilizing critical care physicians and nurses based at Christiana Care Health System through an eCare monitoring center in Delaware.

Neurology / 301-475-6399
Sleep Center / 888-765-4749
Rehabilitation Medicine
The Department of Rehabilitation Medicine offers physical therapy, occupational therapy and speech therapy on an inpatient and outpatient basis for adult and pediatric populations. Our goal is to help clients of all ages achieve their maximum functional level.

Individual programs are developed to meet each patient’s needs and goals, whether it be to walk independently again or to break a high jump record, to complete a meaningful sentence or sing in an opera. Rehabilitation medicine includes making patients stronger, relieving their pain, helping them regain daily living skills, and/or optimizing their communication skills. The department offers education about illnesses or injuries, and helps patients adapt to these conditions.

The department has special women’s health services in lymphedema and osteoporosis. Comprehensive pediatric services are also available. We have a low vision program to maximize the use of residual vision for patients with a variety of conditions.

Surgical Services
The medical and nursing staff members at MedStar St. Mary’s Hospital are expertly trained to perform and assist with surgical procedures using the latest high-technology equipment and techniques. Performing more than 6,000 procedures annually, our staff is experienced in all aspects of surgery, including orthopaedics, oral surgery, ophthalmology, otolaryngology, gynecology, urology, vascular and general surgery. Our surgery department features the latest in medical technology, including bi-spectral monitoring during anesthesia.

Call to request information about our surgical experience, what to expect as a surgical patient and how to prepare for your procedure.

Women’s Health Services
Women’s Health Services is a convenient and friendly entry point into the many services devoted to the health needs of women during every stage of her life. We offer an array of services, including digital mammography and 4-D ultrasound; bone densitometry; stereotactic breast biopsy; treatment of lymphedema; osteoporosis and incontinence; support for new moms and their growing families; and a series of Health Connections activities targeting each stage of a woman’s life. Women’s imaging services are located in the Outpatient Pavilion within a special suite dedicated to patient comfort and privacy that includes a separate waiting area and changing rooms.

Wound Healing Center
The new MedStar Health Wound Healing Center at MedStar St. Mary’s Hospital incorporates the latest technologies available to treat chronic wounds, including pressurized chambers for hyperbaric oxygen therapy. The center is a state-of-the-art facility and is fully staffed with a highly skilled, multi-disciplinary team of experienced medical and program directors. In addition, physician specialists, nurses and technologists are trained to use the latest assessment and therapeutic methods. Now, individuals in Southern Maryland with venous stasis and diabetes, as well as those with pressure sores, burns, post-surgical and other non-healing wounds have a close-to-home option for care. The center is located in the front of our main hospital building and offers a convenient outside entrance with adjacent parking.

There is no need to suffer from chronic wounds any longer. Come for your personalized, professional care close to home in a modern, light and airy setting designed for patient comfort.

Most insurance accepted, including Medicare/Medicaid.

Get Connected to Health

Primary adult health care is available for the under-and uninsured in St. Mary’s County. Care is delivered to Lexington Park and Charlotte Hall through the mobile health center five days a week. Cost is just $15, payable at the time of each visit. HealthShare is accepted.

Among the Get Connected to Health services offered:

• Flu shots for patients over age 18, when available
• Limited laboratory testing
• Pregnancy and blood sugar tests
• Much, much more

To learn more or to schedule an appointment, call 301-475-6019.

MedStar Family Choice

A New Choice Has Arrived!
Residents of St. Mary’s County who are eligible for or already have Medicaid coverage may now enroll in MedStar Health’s Managed Care Organization - MedStar Family Choice.

Enrollment in MedStar Family Choice is free! And, you’ll have access to more than 1500 physicians and healthcare providers and your membership entitles you to other important benefits, including dental, mental health, pharmacy, vision, and more.

For more information about MedStar Family Choice or to see if you are eligible for membership, visit MedStarFamilyChoice.net or call 800-404-3549.

GuidetoMedicalServices
Thank you to our hospital family of associates, Medical Staff, volunteers, and students for the dedication, compassion and quality of care on behalf of our patients. The strength of our team is the reason we achieved this level of recognition.

MedStar St. Mary’s Hospital’s selection was based on 10 measures, including public information about quality, patient safety, cost, and patient satisfaction. This is important to us because our patients are our family, friends and neighbors.

Chairperson of Pathology

Fahmi Fahmi, MD
Chairperson of Pediatrics

Robert Konkol, MD
Chairperson of Psychiatry

Anna Choi, MD
Interim Chairperson of Radiology

The ideal doctor is one you can trust with the sensitive and personal details of your health. You need to communicate openly with your doctor and receive clear, thorough information in return.

You can choose your doctor from a variety of specialties, depending on your health plan. Some require your primary care physician to be an internist or family practitioner. All plans vary, so be sure to check. For instance, if you’re a woman, you might be able to choose an obstetrician/gynecologist (OB/GYN) who specializes in childbirth and diseases of the female organs. If you have children, they may need a pediatrician, whose patients range from newborns to teenagers. Or, you may prefer one doctor who can treat the whole family. A general practitioner or family practitioner, whose training involves a multi-year residency, will be responsible for your entire family’s health needs and will refer you to specialists as necessary.

No matter which doctor you choose, there are some things you can do to help ensure that the relationship is a good one.

Be Honest.
Your physician can’t give you the proper care without accurate information. Your health is personal, so it’s important to find someone with whom you can be open and honest.

Ask Questions.
Medical treatment can often be complicated, but you still have the right to know about your health situation and to have your questions answered until you fully understand what is involved.
Stephen Michaels, MD
Vice President, Medical Affairs

Medical Training

Medical school:
Georgetown University School of Medicine

Internship in general surgery:
State University of New York at Stony Brook

Residency in orthopaedic surgery:
State University of New York at Stony Brook

Fellowship in spinal surgery:
Rush-Presbyterian-St. Luke’s Medical Center

Vice President for Medical Affairs

Dr. Michaels joined the MedStar St. Mary’s Hospital administrative team in January 2011 as Vice President, Medical Affairs - a new position to the hospital and its administrative structure. Dr. Michaels brings a great deal of experience directly related to the management of medical affairs, physician recruitment and retention, and the expansion and delivery of healthcare services to the community.

Dr. Michaels comes to MedStar St. Mary’s with a record of successful collaboration in team building as a medical staff president, initiating and facilitating improvements in hospital core measures, performance improvement and safety initiatives, and revising credentialing criteria, among others. His background includes leadership of administrative, regulatory and review committees, as well as community advisory panels on health care. He practiced orthopaedic and spinal surgery in Montgomery and Prince Georges Counties for many years and was the managing partner for his successful practice.

His strong commitment to the recruitment and retention of highly skilled, expertly trained physicians and surgeons in order to deliver continued expansion of hospital services to the community is a priority for Dr. Michaels, and he is an active participant in this process, working with MedStar Health to enhance efforts to provide Southern Maryland with specialists in fields that are under-represented.

Collaboration with MedStar Health has already addressed some of the under-represented specialty areas by having visiting physicians at MedStar St. Mary’s. However, as our community grows and we want to provide the most advanced technologies and techniques, we still need additional physicians to establish “home practices” here. By utilizing the resources of MedStar St. Mary’s and the MedStar Health system, Dr. Michaels is fully engaged in multiple arenas to benefit the needs of the community and advocate for the continued delivery of quality health care in Southern Maryland.
Allergy & Immunology

**Waiting in the Emergency Department for non-emergency care?**

**MedStar St. Mary’s Mobile Medical Unit** brings affordable adult health care to your neighborhood five days a week with **Get Connected to Health.**

No health insurance or just minimal coverage? Don’t worry. We provide routine screenings, physicals, adult immunizations and more.

**Cost is $15.00 per visit** due each time you visit Get Connected to Health.

The next time you have a need for non-emergency care, call Health Connections at 301-475-6019 for more information or to schedule an appointment.

---

*Doctors of Osteopathic Medicine (DOs) are fully licensed physicians. They provide a full range of services, from prescribing drugs to performing surgery, and they use the latest medical tools. DOs offer a unique approach to patient care. Osteopathic physicians are trained to teach patients how to prevent illness and injury by maintaining a healthy lifestyle, look at the whole person to reach a diagnosis without focusing just on symptoms, and to help the body heal itself.*
Endocrinology

These physicians study the glands and hormones of the body and treat their related disorders.

Nephrology  
These physicians are involved in the diagnosis and treatment of disorders involving kidneys.

* Doctors of Osteopathic Medicine (DOs) are fully licensed physicians. They provide a full range of services, from prescribing drugs to performing surgery, and they use the latest medical tools. But DOs offer something special—their unique approach to patient care. Osteopathic physicians are trained to teach patients how to prevent illness and injury by maintaining a healthy lifestyle, look at the whole person to reach a diagnosis without focusing just on symptoms help the body to heal itself.
Neurologists have expertise in the diagnosis and treatment of disorders in the nervous system.
