

Howard Federoff, MD, PhD

Executive Vice President for Health Sciences, Georgetown University
Executive Dean, Georgetown University School of Medicine

As Executive Vice President for Health Sciences at Georgetown University and Executive Dean of the School of Medicine, Dr. Federoff is responsible for Georgetown University Medical Center (GUMC). He is a professor of Neurology and Neuroscience.

Prior to Georgetown, he held appointments as Senior Associate Dean for Basic Research; Professor of Neurology, Medicine Microbiology and Immunology; and Professor of Oncology and Genetics at the University of Rochester School of Medicine, and as Founding Director of the Center for Aging and Development Biology at the Aab Institute of Biomedical Sciences and Founding Division Chief of Molecular Medicine and Gene Therapy. After joining the Rochester faculty in 1995, he also served as Director of the University of Rochester's Interdepartmental Neuroscience Program. Dr. Federoff's research interests include gene therapy and neurodegenerative diseases such as Parkinson's, and Alzheimer's. His research has received support from the NSF, the NIH, and the DOD. He has published widely in peer-reviewed journals and served as a reviewer for many journals, and currently serves on the editorial boards of the *Journal of Parkinson's Disease*, *Open Genomics Journal* and *Journal of Experimental Neurology*. Dr. Federoff served as Chair of the NIH Recombinant DNA Advisory Committee from 2007-2010. He is a Fellow of the AAAS and National Academy of Inventors.

Before joining the Rochester community, he was Associate Professor of Medicine and Neuroscience at Albert Einstein College of Medicine, from which he received MS, PhD, and MD degrees. He did his internship, residency, and clinical and research fellowships at Massachusetts General Hospital/Harvard Medical School, and practiced medicine at the Albert Einstein College of Medicine and University of Rochester.
