For inpatient:
202-877-1152

For Outpatient and Day Treatment:
202-877-1945

At MedStar NRH, we focus on the whole person, helping patients reach the highest level of health and independence possible. Patients in our Spinal Cord Program benefit from our role as a teaching facility and our active research programs.

The Spinal Cord Program at MedStar NRH is fully credited by CARF.

As a patient with MedStar NRH, you may enter the Spinal Cord Program through our Outpatient/Day Treatment program or our inpatient program.

Conditions we treat include:

Traumatic Spinal Cord injury
Acute and Chronic Non-traumatic Spinal Cord injury and disease
Postoperative spinal surgery
Multiple Sclerosis
Guillain Barre Syndrome
Post Polio syndrome

Depending on the patient's needs and goals, treatment may include occupational therapy, physical therapy, psychology and neuropsychology, rehabilitation engineering, social work, speech-language pathology, therapeutic recreation, and vocational rehabilitation.
