

Driving after an amputation: Important facts

For driver and pedestrian safety, it is illegal to drive using a prosthesis on your RIGHT leg.

Changes can be made to your car so you are able to drive:

- LEFT foot accelerator
- HAND brake/accelerator controls

Medstar NRH offers an outpatient Driver Training Program

- Pre-driving evaluation of motor, vision, cognitive skills
- On-the-road evaluation
- Training with adaptive driving equipment
- Advice on how to adapt your own car or purchase the right equipment
- Advice on financial assistance
