INTRODUCTION

MedStar Family Choice is pleased to provide the *2014 MedStar Family Choice - Maryland HealthChoice Prescribing Guide* to be used when prescribing for patients covered by the pharmacy plan offered by MedStar Family Choice. **This is a closed formulary and only those drugs listed in this formulary will be covered by MedStar Family Choice.**

The drugs listed in the *MedStar Family Choice - Maryland HealthChoice Prescribing Guide* have been reviewed and approved by the MedStar Family Choice Pharmacy and Therapeutics Committee. The drugs have been selected to provide the most clinically appropriate and cost-effective medications for patients who have drug benefits administered through MedStar Family Choice - Maryland HealthChoice. There may be occasions when an unlisted drug is desired for medical management of a specific patient. In those instances, the unlisted medication may be requested through the Medical Exception process.

*The information contained in this formulary and its appendices is provided solely for the convenience of medical providers. This formulary is subject to state-specific regulations and rules, including, but not limited to, those regarding generic substitution, controlled substance schedules, preference for brands and mandatory generics whenever applicable. MedStar Family Choice does not warrant or assure accuracy of such information nor is it intended to be comprehensive in nature. This formulary is not intended to be a substitute for the knowledge, expertise, skill and judgment of the medical provider in his or her choice of prescription drugs. MedStar Family Choice does not assume responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. **The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.***

PREFACE

The *MedStar Family Choice - Maryland HealthChoice Prescribing Guide* is organized by sections. Each section includes therapeutic groups identified by either a drug class or disease state. All drugs listed were selected to be on this formulary. Products are listed by generic name. Brand-name products are included as a reference to assist in product recognition. Unless exceptions are noted, generally all dosage forms and strengths of the drug cited are covered.

This formulary covers selected over-the-counter (OTC) products. You are encouraged to prescribe them when clinically appropriate. A prescription (written or telephoned) is required and refills are permitted. The prescription expires under Maryland Pharmacy Law in 12 months. Condoms do not require a prescription. For covered products refer to the Over-The-Counter (OTC) Drug Coverage section that is located near the end of the introductory sections of this formulary.

PHARMACY AND THERAPEUTICS (P&T) COMMITTEE

The MedStar Family Choice P&T Committee includes physicians, pharmacists, and nurses. The Committee meets bimonthly to evaluate drugs for formulary inclusion and to develop policies concerning formulary and drug utilization management. Please visit the MedStar Family Choice website at www.medstarfamilychoice.com to view the decisions of the MedStar Family Choice P&T Committee and any applicable changes. The main features of the MedStar Family Choice P&T Policies are also on the website in the FAQs.

Please visit www.mdmahealthchoicerox.com to view the *MedStar Family Choice - Maryland HealthChoice Prescribing Guide*. This Maryland Department of Health and Mental Hygiene (D.H.M.H.) sponsored site contains the formularies of all the Managed Care Organizations (MCO) and is updated frequently. MedStar Family Choice formulary information can also be found online through ePocrates. Registration is free and available at www.epocrates.com.

PRODUCT SELECTION CRITERIA

The MedStar Family Choice Pharmacy and Therapeutics Committee considers clinical information on new-to-market drugs that are typically included in an outpatient pharmacy benefit. The evaluation includes all or part of the following:

- Safety
- Efficacy
- Comparison studies
- Approved indications
- Adverse effects
- Contraindications/Warnings/Precautions
- Pharmacokinetics
- Patient administration/compliance considerations

When a new drug is considered for formulary inclusion, it will be reviewed relative to similar drugs currently on formulary. In addition, the entire *MedStar Family Choice - Maryland HealthChoice Prescribing Guide* is reviewed on an annual basis.

All the information in the MedStar Family Choice - Maryland HealthChoice Prescribing Guide is provided as a reference for drug therapy selection. Specific drug selection for an individual patient rests solely with the prescriber.

GENERIC AVAILABILITY

Boldface type of a generic drug name in this book indicates generic availability of that product. However, not all strengths or dosage forms of the generic name in boldface type may be generically available. In some cases, **the brand name listed is a generic drug**. Examples of the latter include Levoxyl and Trivora.

GENERIC SUBSTITUTION

Generic substitution is a pharmacy action whereby a generic version is dispensed rather than a prescribed brand-name product. An important consideration for generic substitution is the knowledge that all approvals of generic drugs by the FDA since 1984, and many generic approvals prior to 1984, have a showing of bioequivalence between the generic versions and the reference brand product. To gain FDA approval:

1. The generic drug must contain the same active ingredient(s), be the same strength and the same dosage form as the brand-name product.
2. The FDA has given the generic an "A" rating compared to the branded product indicating bioequivalence, and has determined the generic is therapeutically equivalent to the reference brand. The ratings of generic drugs are available by referring to the FDA reference, *Approved Drug Products with Therapeutic Equivalence Evaluations* (Orange Book).

When the above two criteria are met, a generic can be substituted with the full expectation that the substituted product will produce the same clinical effect and safety profile as the prescribed product. Drug products that have a narrow therapeutic index (NTI) can also be guided by these principles. It is not necessary for the health care provider to approach any one therapeutic class of drug products (e.g., NTI drugs) differently from any other class, when there has been a determination of therapeutic equivalence by the FDA for the drug products under consideration. Also, additional clinical tests or examinations by the physician are not needed when a therapeutically equivalent generic drug product is substituted for the brand-name product.

It is recommended that generic substitution not be exercised by the pharmacist with multisource products that appear in the Orange Book and carry a "B" rating, indicating that these products cannot be considered therapeutically equivalent to other products in the group.

DRUG EFFICACY STUDY IMPLEMENTATION (DESI) DRUGS

Drugs first marketed between 1938 and 1962 were approved as safe but required no showing of effectiveness for FDA approval. Beginning in 1962, all new drugs were required to be both safe and effective before they could be marketed. This legislation also applied retroactively to all drugs approved as safe from 1938-1962. The DESI program was established by the FDA to review the effectiveness of these pre-1962 drugs for their labeled indications, and a determination of fully effective was made for most of these products and they remain in the marketplace. A few DESI products remain classified as "less than fully effective" while awaiting final administrative disposition. Also, classified as DESI are many products listed as identical, similar, or related to actual DESI products. Some plans will not pay for DESI "less than fully effective" drug products. **DESI drugs are excluded by MedStar Family Choice. Exceptions: Anusol-HC suppositories, Donnatal and Midrin are covered.**

MEDICAL EXCEPTION

If a non-covered drug is desired for medical management of a patient, a medication exception may be requested by calling MedStar Family Choice at: 1-800-905-1722.

STEP THERAPY (ST)

Drugs indicated with a "ST" require Step Therapy authorization for coverage. When using drugs within select drug classes, this program requires a certain order to be followed for the "ST" designated drugs to be covered by your benefit plan.

Within the Step Therapy program, drug therapy is begun with the most cost-effective and safest drugs. If this initial therapy proves unsuccessful, treatment may move to other, more costly therapy. Step Therapy helps ensure that a plan member receives clinically appropriate, cost-effective medication.

The following drugs are subject to Step Therapy:

Drugs

ADVAIR DISKUS
 ADVAIR HFA
 CARMOL 10, CARMOL 20
 CRESTOR
 DULERA
 lansoprazole delayed-rel (PREVACID)

OVER-THE-COUNTER (OTC) DRUG COVERAGE

In addition to prescription benefits, all over-the-counter medications on this list are covered by MedStar Family Choice with a written or telephoned prescription. Refills are permitted. Prescriptions may be written for the State limited 12 month maximum. OTC products covered are restricted to generics when available. Brand names are provided as reference only. If both prescription and OTC products are available, you are encouraged to prescribe OTC products when clinically appropriate.
