Adding POP to Your Asthma Care
QI Learning Collaborative

As per a notification we received from the Children's National Health Network (CNHN) on January 23, 2015, CNHN has partnered with Children's National's IMPACT DC asthma program to offer their 3rd asthma QI MOC learning collaborative.

We have been asked to alert our primary care providers in Maryland and the District of Columbia about CNHC's newest 2015 quality improvement project which is an Advanced Asthma QI program- "Putting POP (Population Health) in Your Asthma Care". They will work with partnering practices and providers to:

- Identify and track all children PCMH with asthma
- Develop systems to "risk-stratify" and track children for targeted interventions
- Measure seasonal outreach to improve asthma care and reduce ED and convenience care utilization
- Improve practice resources and billing for asthma management & education
- Improve asthma communication and care coordination with schools
- Leverage new ICD10 asthma codes for smooth transition to ICD10
- Position primary care medical home practices for asthma quality metrics and incentives

Their QI project will run from February 2015 – November 2015. Eligible providers can earn 25 points Part 4 MOC credit and up to 20 hours CME credits for participation. A short web-based information call will occur on Thursday January 29th from 2:15 - 12:45 pm. **Space is limited! Sign up today- <https://www.surveymonkey.com/s/asthmaqi>**

Please see the attached flyer for details. For additional information, please contact Tamara John @ CNHN (tjohn@childrensnational.org 202-476-5481) directly.

ADDING POPULATION HEALTH TO YOUR ASTHMA CARE!

Adding POP to Your Asthma Care QI Learning Collaborative

Feb — Dec 2015

Enrollment Begins:

January 2015

Our new asthma QI learning collaborative will coach practices to identify and improve asthma care for all children in your practice using a *population based* approach .

- Identify and track all children with asthma in your practice
- Develop systems to stratify children by risk for targeted interventions
- Plan and measure seasonal outreach (spring, summer, fall) to improve asthma care and reduce ED and convenience care utilization
- Improve your practice resources & billing for asthma mgmt & education
- Improve asthma communication & care coordination with schools
- Leverage new ICD-10 asthma codes for smooth transition to ICD10
- Position your practice for asthma quality metrics and incentives

Asthma QI LC Results 2012-2013

Over 300 providers and 75 practices participated in our previous asthma QI learning collaboratives to measurably improve their asthma care visits for MOC and CME credit.

Children's National Health Network QI Team will provide:

- Practice support from quality improvement coaches
- Access to pediatric asthma experts
- Access to current pediatric asthma tools and resources
- A seamless web-based process for data submission & learning
- Provider and practice performance feedback
- ABP/ABFM MOC Pt 4 QI project approval & provider attestation (25 pts)
- Up to 30 hours of CME credit for participation in QI activities

Space is limited! Sign up today- <https://www.surveymonkey.com/s/asthmaqi>
