

**UPDATE to the MEDSTAR FAMILY CHOICE FORMULARY
Maryland Health Choice
Changes from the September 2016 Pharmacy and Therapeutics Committee Meeting**

Updates of the entire formulary as a .pdf file will continue to be available quarterly on this Website. More frequent updates are available on ePocrates, too.

Paper booklets of the 2016 Formulary have been mailed. If you have not received a copy or would like additional copies, please contact your Provider Relations Representative. The updated .pdf was posted for the July 1, 2016 update.

Additions that have or will go into effect in the next few weeks:

- **rosuvastatin**
- **levocetirizine**
- **alclometasone 0.05% cream and ointment**
- **Hemangeol™ (propranolol HCl oral solution) for children less than 6 years of age**

Additions with Prior Authorization effective on or around October 1, 2016

- **None**

Removals effective on or around October 1, 2016:

- **Zepatier** (elbasvir/grazoprevir) – [Harvoni and Sovaldi remain on the formulary]

Removal of Prior Authorization:

- **None**

Managed Drug Limitations & Step Therapy

- **None**
