

**MedStar Family Choice Maryland HealthChoice
Provider Alert
March 16, 2018**

It has come to our attention that **Hoffberg and Rosen Rehabilitation and Pain Management Associates, PA** (in Towson and Reisterstown) will not be writing controlled substance prescriptions until further notice. This will have a significant impact on patients that received care from that office. If a MedStar Family Choice (MFC) member requests assistance from your office due to this change, please call MFC at **410-933-2200 or 1-800-905-1722 option 2**. MFC will provide full prescription histories for our members upon request.

MFC is working diligently to find alternative sources of pain management care for our displaced members. In the interim, we appreciate your assistance in treating these members. Many of these patients are on opioid doses that are higher than what is typically prescribed by primary care physicians. While we realize that writing these prescriptions may be outside of the standard practice in the primary care setting, MFC appreciates your assistance in bridging this gap in care.
