

President Gregory J. Argyros, MD, MACP, FCCP

Gregory J. Argyros, MD, MACP, FCCP, was appointed president of MedStar Washington Hospital Center effective July 1, 2018.

He joined MedStar Washington Hospital Center in 2012, and most recently has been senior vice president, Medical Affairs, and Chief Medical Officer. Dr. Argyros provided overall clinical leadership and oversight at the Hospital Center, with key responsibilities of quality of care, medical education and research.

Dr. Argyros spent 25 years in the Medical Corps of the U.S. Army, most recently serving as Chief of Medicine at Walter Reed Army Medical Center and Director of Education, Training and Research for the National Capital Region. In these roles, Dr. Argyros had the responsibility of merging Walter Reed with the National Naval Medical Center.

Dr. Argyros graduated from the United States Military Academy at West Point, and received his medical degree from the University of Pittsburgh. He completed an Internal Medicine Residency at Walter Reed, and was elected to Alpha Omega Alpha medical honor society. Dr. Argyros completed a fellowship in Pulmonary and Critical Care Medicine at Walter Reed.

Dr. Argyros is board-certified in Internal Medicine, Pulmonary Medicine and Critical Care Medicine, and is a fellow of the American College of Chest Physicians. Dr. Argyros was named a Master of the American College of Physicians (ACP), an honor given only to those physicians who “demonstrate personal character, positions of honor, contributions toward furthering the purposes of the ACP, eminence in practice or in medical research, or other attainments in science or in the art of medicine.”
