

# At A Glance

After more than a century of healing, MedStar Harbor Hospital is a mainstay in the community, serving patients from Baltimore City, and Anne Arundel, Baltimore and Howard counties at our convenient waterside location, with the services of a large, regional medical center in a smaller, more personal environment.

From internal medicine and surgery, obstetrics, diabetes, behavioral health, orthopaedics, and geriatrics to cardiology and urology, our team of caring physicians and associates serves the unique needs of every patient.

MedStar Harbor offers one of the nation's leading internal medicine residency programs. Our residents, who play a vital role in the care of our patients, are among the best in the country, as evidenced by their consistent 100 percent national board certification pass rate and standardized test scores in the top seven percent nationwide.

MedStar Harbor is also home to several innovative partners, including the Simulation Training and Education Lab (SiTEL), the education technology group of MedStar Health. SiTEL transforms educational approaches in health care by developing 21st century training technologies with innovative educational approaches that are user friendly and easily accessible.

Additionally, we're home to the PAREXEL Early Phase Clinical Unit. With 90 early phase research beds, the unit specializes in First in Human and High Risk Early Phase protocols, with direct expertise in Multiple Sclerosis, Parkinson's Disease, Mild Cognitive Impairment, Infectious diseases, including HIV and HCV, Dermatological diseases, Obesity, Diabetes and more.

Baltimore magazine consistently recognizes MedStar Harbor physicians as "the best of the best" in its annual "Top Doctors" issue; and for their Excellence in Nursing issue, MedStar Harbor nurses are saluted by their peers and patients for their extraordinary contributions to healthcare.

The second half of the fiscal year saw the arrival of the COVID-19 pandemic. While the global healthcare crisis had a significant impact on care delivery nationally and locally, MedStar Health and specifically MedStar Harbor Hospital remained operational to continue to provide care to our patients. While some programs and elective procedures were paused and visitor restrictions implemented, MedStar Harbor Hospital was still able to deliver care, of the highest quality, in a safe environment to the members of our community who required immediate medical attention.
